

A wholly owned subsidiary of CAV Aerospace, RCL Industries has been operating in Central and Eastern Europe for over 20 years.

RCL has a base in Rzeszow, south eastern Poland, with its head office in the UK. The company employs a highly qualified team of engineers and linguists, and has the ability to co-ordinate complex projects of any scale and in many languages, offering rapid development opportunities alongside significant cost saving potential.

Initially a project and supply chain management business, offering opportunities to source from low cost suppliers for any customer across many market sectors, RCL has recently expanded into in-house manufacturing, specifically small component (<1m) machining.

RCL INDUSTRIES UK & POLAND

In-house machining capabilities:

- ▶ 4 x Haas VF1-D vertical machining centres
 - ▶ Traverse: 508mm x 406mm x 508mm
 - ▶ Spindle: 7,500rpm, 20HP, high torque vector drive
 - ▶ Full 4th Axis brushless rotary table with 210mm diameter faceplate
- ▶ 4 x Haas SL20 SE turning centres
 - ▶ Traverse: 262mm dia x 508mm
 - ▶ C Axis with live tooling
